GUN

C4G FOAM

Gun cleaning foam with indicator

C4G FOAM is gun cleaner developed for those who seek gun care on a professional level. Product forms dense expanding foam that fills all corners of the barrel. C4G FOAM effectively dissolves lead, copper and gun powder residues. Another invaluable feature is indication of fouling, the foam changes color to blue in presence of gunshot residue.

200 ml - FOR1113020

C4G

Anti-corrosion gun cleaner

Gun cleaner C4G is a non-oil based cleaner and degreaser for metal surfaces, which need thorough cleaning. It efficiently dissolves and cleans a gun from gunpowder, copper and lead residue and actively removes rust. It forms a dry anti-corrosion film, which serves also as a separation layer reducing abrasion and deposition of the bullet and gunpowder residue in the barrel and thus makes further cleaning easier.

200 ml- FOR1012020

200 ml- FOR1013020

250 ml- FOR1011025

Gun oil

Gun oil O4G treats, preserves and lubricates metal parts of a gun. Thanks to its consistency and extension tube, the oil penetrates into the shooting mechanism and protects it. It provides a long-term protection of guns from rust forming.

200 ml - FOR1073020

O4G EXTRA

Gun oil

Gun oil O4G EXTRA serves for treatment and preservation of metal and wooden parts of a gun. Thanks to its consistency the oil remains evenly spread all over the gun. It provides a long-term protection against corrosion. It reduces the wear and abrasion of moving parts. It also treats, protects and refreshes appearance of wooden parts and accentuate the wood grain. The oil is odorless.

250 ml - FOR1031025

REWOIL

Revitalising oil for wooden parts of a gun

REWOIL thanks to its consistency perfectly penetrates into the structure of wood. The oil revitalises appearance of wood and accentuate woodgrain. It increases flexibility of wood and protects against abrasion and cracking. It also prevents penetration of water into wood. It is suitable for all wood finishes. Oil is odourless.

250 ml - FOR1041025

V4G

V4G gun

grease is an effective lubricant and protectant for firearms, paintball and airsoft guns. It reduces friction and wear of moving parts and protects the gun from corrosion and jamming. It is ideal for long-term storage and protection of guns.

70 g - FOR1051007

CC-GUN

Gun cleaner and preservative

CC-GUN is a highly efficient preparation for cleaning and preservation of guns in one step. It effectively dissolves and cleans the gunpowder, lead and copper residue. It actively removes rust. Thanks to an excellent lubrication ability CC-GUN reduces abrasion of moving parts, thus extending the life of a gun.

200 ml - FOR1022020

250 ml - FOR1021025

CC-GUN ZK

50 ml - FOR1083005

Gun cleaner and preservative with increased anti-corrosion protection

The substance contained in the product binds to metal parts of a gun thereby forming the anti-corrosion film, which protects the gun against corrosion even after wiping the oily coating.

GUN CLEANER PROFI

Gun cleaner PROFI

is specially developed for guns using military ammunition with nitroglycerine and mercury percussion caps. It effectively neutralizes and removes all after-shot residuals of gunpowder, copper and lead. It removes rust and preserves metal parts of guns. It degreases and cleans metal surfaces that need thorough cleaning.

200 ml - FOR1062020

ARMOIL

Cleaning and preservation gun oil

Preparation effectively cleans, lubricates and preserves guns. Due to its consistency and extension tube the oil penetrates into the shooting mechanism and protects it. ARMOIL provides long-term protection against corrosion and also treats and protects wooden parts of a gun.

400 ml - FOR1093040

Salt lick paste

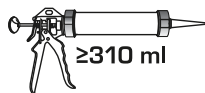

AtraSalt paste is nutritional supplement which supplies game with necessary minerals, especially in the winter. It can also be used to attract game to desired place, whether it is for watching, taking pictures or hunting. Aromatic compounds contained in the product help game to locate the salt paste, thus increasing game activity at the salt-lick and surrounding area.

TUSKLER

Tusk filling compound

TUSKLER is a two part compound used for filling wild boar tusks. After curing, TUSKLER is solid and volume-stable thus preventing tusks from cracking. Easy handling and natural color ensure perfect result. The packaging is sufficient for up to 10 sets of tusks, and it contains two part filling compound, beaker, rubber gloves, plasticine and wooden stirrer.

VYVASOL

VYVASOL

is an effective means of boiling trophies. Substances contained in the product help to breakdown and separate tissue from the bone, and thus it shortens boiling time. It degreases and partially bleaches the trophy

250 g - FOR2011025

500 g - FOR2011050

1000 g - FOR2011100

VYVASOL EXTRA

250 g - FOR2041025

VYVASOL EXTRA 3 in 1

is an effective preparation which combines three steps needed for trophy preparation. It effectively cleans, degreases and bleaches in one step. Substances contained in the product help to breakdown and separate tissue from the bone, thus shortening the boiling time.

TROFI – BP

Bleaching paste

TROFI-BP paste is used for bleaching skulls and bones or for restoration of whiteness of old trophies. Easy application ensures perfect bleaching without undesirable bleaching of antlers or horns. The packaging is sufficient for approx. 4 roe deer or 2 red deer skulls.

150 g - FOR2021015

TROFI-BP powder

is an effective preparation for bleaching skulls and bones. Substances contained in the product bleach effectively and evenly. Thanks to its powder consistency is easy to handle and store.

250 g - FOR2051025

1000 g - FOR2051100

TROFI – BL

TROFI-BL

is a bleaching solution based on hydrogen peroxide (11,99 %). It effectively and quickly bleaches freshly cleaned as well as older trophies. TROFI-BL can be used concentrated or diluted in a ratio up to 1:2.

1000 ml - FOR2111100

TROFICARE

Recovery solution for trophies

Recovery solution serves for treatment and preservation antlers, horns and skulls. It preserve natural appearance and does not change shine or color and provides long-term protection against weathering, oxidation and ageing.

200 ml - FOR2032020

TROFIWAX

Wax for trophies

Product serves for treating and conservation of skull, antlers and horns. TROFIWAX forms protective film, which protects trophy against weathering, oxidation and ageing. It also preserves natural appearance of trophy and accentuate color and shine of antlers.

150ml- FOR2073015

ADUSTER

Antistatic care for fur and feathers

Preparation for treatment of furred and feathered taxidermy mounts. Antistatic film reduces accumulation of dust on the surface, lavender oil protects fur and feathers against pests especially moths.

200 ml - FOR2083020

WINDVIEW

Wind direction indicator powder

WINDVIEW serves for determining of wind currents which are hard to feel. WINDVIEW is easy to see even in poor visibility. It is invaluable aid for every hunter.

OUTDOOR

ecoline

OUTDOOR

DOOR

Explore and
protect nature
with ECOLINE
products.

**We at TYRCHEM love
nature and that is why
we bring you products
which combine environmental
compatibility and high functionality.**

Features of ECOLINE products:

- water-based, means water is used as carrier of active ingredients instead of organic solvents.
- environmentally compatible ingredients, the ingredients have been selected considering biodegradability, renewability and environmental impact.
- PFC free, the product are 100% free of per- and polyfluorinated compounds (PFCs).
- VOC free, the products do not contain volatile organic compounds (VOCs) with exception of FONAX L containing very low amount of VOCs (only 4%).
- APEO free, the product are free of alkylphenol ethoxylates (APEOs).

FOR OUTDOOR eco, designed with nature in our hearts.

FONAX L SOFT

200ml – FOR3142020

FONAX L eco soft

is a gentle cleaning and nourishing foam for all types of leather and artificial leather. It was developed with regard to the environment. It is water-based and contains easily degradable plant derived surfactants, does not contain ethoxylated alkylphenols (APEOs). Contains low amount (less than 4%) of volatile organic compounds (VOCs). It is suitable for leather shoes with or without membrane, clothing and accessories (gloves, bags, belts, etc.) as well as for leather furniture. It is readily biodegradable and environmentally friendly.

Features:

- gentle yet effective
- cleans and nourishes leather
- scent and dye-free
- leaves no residue
- plant derived surfactants
- water-based
- PFC and APEO free
- VOC less than 4%
- 100 % biodegradable

B-WAX NEUTRAL

100g / 125ml – FOR315101N (Neutral)

B-WAX eco NEUTRAL

is a neutral coloured regeneration and waterproofing wax containing bees, lanolin and carnauba wax. It is suitable for treating products from all types of leather, mainly leather footwear with or without membrane. B-WAX eco softens, nourishes and protects the leather from water, thus prolonging the durability of leather products. It also revives the colour and increases the shine. The application is quick and easy. No added scents or dyes. VOC and PFC free. It is 100% biodegradable and environmentally friendly.

Features:

- superior water-repellency
- maintains breathability
- nourishes, softens, shines and protects leather
- contains three natural waxes (bees, lanolin and carnauba)
- VOC and PFC free
- 100% biodegradable

ARIXOL UNI

ARIXOL UNI eco

is an effective, but gentle laundry detergent for sport clothing and equipment made of natural and synthetic materials including functional (membrane and insulation) materials, suitable for both machine and hand washing. ARIXOL UNI eco effectively removes dirt and leaves no residue, thus helping to restore the original properties of functional materials. It leaves the garments completely odourless after washing. ARIXOL UNI eco was developed with maximum respect for environment, it contains plant derived surfactants and does not contain any bleaches, optical brighteners, fabric softeners, fragrances, dyes, enzymes, phosphates, fluorocarbon compounds (PFCs), ethoxylated alkylphenols (APEOs) and volatile organic compounds (VOCs). It is 100% biodegradable and environmentally friendly.

300ml - FOR3131020

1000ml - FOR3131100

Features:

- gentle to all materials
- suitable for membrane and insulation materials
- maintains breathability and water repellency
- scent and dye free
- effectively removes odors
- leaves no residue
- concentrated, dosage from 15 ml per wash
- washing at 30 to 60 °C
- plant derived surfactants
- PFC, VOC and APEO free
- 100 % biodegradable

WAPROX UNI

WAPROX UNI eco

is a water-based water repellent with UV protection for shoes, clothes and outdoor gear containing modified reactive silicon polymers. It creates a water repellent film on all types of fabric and leather including membrane and softshell materials, while maintaining its breathability. It restores elasticity of fibers, thereby prolonging the durability. It does not change colour of the treated material. It is easy to use and no heat activation is required. It is odourless, what makes it suitable for indoor use. It is completely free of polyfluorinated compounds (PFCs), ethoxylated alkylphenols (APEOs) and volatile organic compounds (VOCs). It is 100% biodegradable and environmentally friendly.

200ml - FOR3012020

500ml - FOR3012050

300ml spray - FOR3013030

Features:

- good water repellency and UV resistance
- maintains breathability
- easy to use
- odorless
- dry/wet application
- no colour change
- heat activation not required
- water-based
- PFC, VOC and APEO free
- 100% biodegradable

WAPROX NANO

(EN) WAPROX NANO

is a water-based waterproofer using nanotechnology for leather and textile developed with respect for the environment. It creates a thin layer of nano particles on the surface of fibers, which radically increases water-repellency (hydrophobicity) and UV protection of all types of textile and leather including membrane and softshell materials, while maintaining its breathability. Thanks to these features it is suitable for waterproofing clothes, shoes and outdoor gear (tents, backpacks, ropes, etc.). It doesn't change the colour of the treated material. It is easy to use and no heat activation is required. It is odourless, what makes it suitable for use indoors. It is completely free of polyfluorinated compounds (PFCs), ethoxylated alkylphenols (APEOs) and volatile organic compounds (VOCs). It is 100% biodegradable and environmentally friendly.

200ml - FOR3112020

500ml - FOR3112050

Features:

- superior water-repellency and UV protection
- maintains breathability
- easy to use
- odorless
- dry/wet application
- no colour change
- heat activation not required
- water-based
- PFC, VOC and APEO free
- 100 % biodegradable

GUPROX eco

is a conditioner for rubber and plastic products like boats, boots, waders, raincoats, wetsuits, tyres, seals, etc., which helps prevent cracking and weathering, thus prolonging the durability. The product penetrates deep into the material, restores its flexibility and color, after drying it creates protective film on the surface. GUPROX eco was developed with maximum respect for environment, it is water-based containing plant derived ingredients only. It is completely free of polyfluorinated compounds (PFCs), ethoxylated alkylphenols (APEOs) and volatile organic compounds (VOCs). It is 100% biodegradable and environmentally friendly.

Features:

- UV protection
- restores, shines and protects rubber and plastics
- easy application
- odorless
- dry/wet application
- water-based
- PFC, VOC and APEO free
- 100 % biodegradable

WHAT ARE PFCs, VOCs AND APEOS AND WHY SHOULD WE CARE?

200 ml – FOR3162020

500 ml – FOR3162050

PFCs is the name of large family of per- and polyfluorinated compounds, from which the most common are C8 PFCs (PFOA and PFOS) and C6 PFCs are increasingly used as an alternative to C8 PFCs, apart from having two carbon atoms less in the structure the C6 PFCs are almost the same. PFCs are highly persistent, bioaccumulative and are considered toxic. PFCs can be found in soil, air, water and animals including humans. PFCs can enter the human body by consumption of contaminated food and water, inhalation of contaminated air as well as by skin contact with materials treated with PFCs. Effects of PFCs on human health have not yet been fully elucidated, but are linked to many health problems including immune and reproductive system damage, liver damage, and increased high blood pressure.

Volatile organic compounds (VOCs) represent a major class of air pollutants. VOCs can enter the human body by inhalation or contact with the skin. VOCs are associated with many health problems such as liver and kidney damage, central nervous and respiratory system damage and cancer. In addition, these substances also contribute to the formation of photochemical smog.

Alkylphenol Ethoxylates (APEOs) are surfactants used in a wide range of products for their emulsifying, dispersing and detergent properties. The vast majority are NPEO (nonylphenol ethoxylate) and OPEO (octylphenol ethoxylate). APEOs are poorly biodegradable and accumulate in the environment and animals including humans. APEOs themselves are not toxic, but toxic substances that cause hormonal disorders are formed by their decomposition.

BEARBUSTER

150 ml spray – FOR3093015

150 ml spray + holster – FOR3094015

Holster for 150 ml spray – FOR309P015

Holster for 300 ml spray – FOR309P030

Bear attack deterrent

BearBuster is a non-lethal bear deterrent designed to stop bear or other large predator attack containing capsicum oleoresin (2%) and dibenzoxazepine (1%). The combination of two active substances causes immediate burning sensation of predator's respiratory tract and eyes, thus temporarily reducing its ability to see, breathe and smell, giving you opportunity to leave. BearBuster has a range of up to 8 meters with wide cone pattern and sprays for approx. 8 seconds (300 ml) / 4 seconds (150 ml).

ATAXOL

50 ml - FOR3103005

Ataxol - Self defense spray

ATAXOL is a non-lethal self-defense spray against human or animal attack, containing dibenzoxazepine (CR tear gas). ATAXOL causes immediate burning sensation of respiratory tract, face and eyes, thus temporarily reducing attacker's ability to see and breathe, giving you opportunity to leave. ATAXOL has effective range up to 5 m with cone pattern and sprays for approx. 11 seconds.

ANTIPA SILVER

Antipa silver

Shoe odour remover containing orange oil and active silver. Effectively removes odours and leaves fresh citrus smell. Long-acting formula prevents formation of odours. Packaging contains two spray caps. Common spray cap and cap with 1 m long extension tube with 360° nozzle suitable for long boots, gumboots, etc.

FOR3071001

Gasket and thread grease

ZAVIX is designed for treatment of threads and gaskets of flashlights, night and thermovisions, etc. It creates barrier against moisture, dust and oxidation, thus helping to prevent gasket cracking and thread jamming.

8g - FOR3071001

AGROculture

AGRO

culture

INVIFENS P10

Scent fence for protection tree nurseries and agricultural crops

INVIFENS P 10 is an animal repellent based on highly concentrated human sweat. When applied properly, effectively repels animals for up to four months. 200 ml packaging is sufficient for 6,3 ha and 500 ml up to 39 ha.

200 ml- FOR4013020

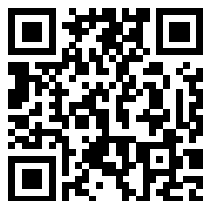

The company TYRCHEM, spol. s r.o.

is family owned business founded in 2002. TYRCHEM specializes in development and production of chemical products tailored for customers in glass, food, automotive and outdoor industry. In 2012, FOR brand was established covering products for sport and outdoor enthusiasts divided into FOR GUN, FOR HUNTER, FOR OUTDOOR and FOR AGRO categories.

In its history, TYRCHEM has built strong relationships with many customers on domestic and foreign markets.

- In 2006, the company obtained the ISO 9001: 2000 certification in research, development, production and sale of small scale chemistry products.
- Since 2016, the company is holder of ECOvadis certification.
- In 2020, the company introduced eco-compatible products to FOR OUTDOOR category with ECOline branding, representing the company's effort to continually develop and advance to satisfy the drive for environmentally friendly products and ever-changing demands of the market.
